

FULL-TIME

SENIOR PROJECT MANAGER

Qpinch is looking for a leading and innovative senior project manager (full-time/based in Antwerp)

What will you do

- As part of the core team you play a key role in further building/scaling-up the company
- Leading a highly driven young international engineering team , with a great capacity for learning
- Setting up an innovative way of working with customers, suppliers and colleagues, by thinking beyond the existing platforms of project management resulting in a new business model.
- Managing EPC projects for chemical heat transformers, from technical & commercial proposal until start-up and performance run.
- Having overall responsibility for the ISBL engineering, procurement, fabrication process, construction, commissioning and start-up until successful delivery.
- Showing excellent relationship management between all parties such as internal engineering team, external engineering team, suppliers, strategic partners and customer.
- Working with contemporary tools such as: COMOS, Aspen (Plus & EDR) , Autocad and SAP/Mariprojects

What you will need

- Experience of 10 years in engineering of chemical projects (€10 M or larger)
Opportunity to grow to the position of COO
- Min. 15 years in total of relevant experience in the petrochemical industry
- Act as a leader and a manager. As a coach you love to share knowledge and to grow people
- Entrepreneurial mindset (focus, set and adapt priorities, move fast, embrace the change, be flexible)
- Organisational requirements: project management, delegation and time management, financial management, negotiating and network skills and passionate about implementing new technologies

- Languages : English must be fluent in writing and discussing
- Willing to travel 10% of the time

If you have the curiosity, passion and collaborative spirit, work with us to help major companies realize important savings while making a dent in global greenhouse gas emissions.

Let's move the world forward, together.
